PETITION TO STOP BOMBARDIER'S INVOLVEMENT IN THE TIBET-CHINA RAILWAY

Dear Mr. Laurent Beaudoin, Chairman & CEO, Bombardier,

In February 2005, Bombardier entered an agreement with the Chinese Ministry of Railways to supply 361 specially designed cars for the China-Tibet railway. This project is considered by Tibetans, supporters, and impartial observers alike to be the single-most devastating project being carried out in Chinese-occupied Tibet today.

When completed in 2007 the railway will be used to transport masses of Chinese settlers and military onto the Tibetan plateau to swamp the already outnumbered Tibetan population and dilute Tibet's distinct culture and religion. The Chinese Government has openly admitted the railway is a politically motivated project and yet Bombardier's Senior Management continues to defend its involvement. Tibetans are not asking Bombardier to resolve the conflict between China and Tibet, but they are asking Bombardier not to exacerbate the situation and facilitate China's destruction of Tibet.

Therefore… We the undersigned urge Bombardier to immediately withdraw its involvement in the China-Tibet railway and any future projects in occupied Tibet.
